

Number of animals producing milk

(head)

India is the top country by number of animals producing milk in the world. As of 2018, number of animals producing milk in India was 142 million head that accounts for 19.11% of the world's number of animals producing milk. The top 5 countries (others are China, Pakistan, Mali, and Bangladesh) account for 40.88% of it. The world's total number of animals producing milk was estimated at 746 million head in 2018.

The description is composed by our digital data assistant.

What is number of animals producing milk?

Milk, eggs, honey and beeswax are included as products of live animals. Fibres of animal origin (mainly wool and silk) are included with fibres of vegetal and animal origin. Milk and dairy products. Estimates of milk production as reported by countries refer to one or more of the following three concepts. Gross production is milk production plus milk sucked by young animals. Production available for consumption is net production less milk fed to animals, milk retained by farmers for food and feed, direct sales to consumers and farm waste. The FAO concept relates to net milk production. Data should be reported by kind of milking animal (cow, sheep, goat, etc.) in terms of whole milk and by weight. In most developed countries only 5-10 percent of whole milk is used directly for human consumption. The bulk of milk production is processed before being marketed as liquid milk (e. G. standardized, pasteurized, skimmed, etc.) or is manufactured into products such as cream, products; the by-milk and low-product items in the net, malted milk,
